

ORGANISATION REGISTER

How can attributes be used by a business?

Simple Business Structure

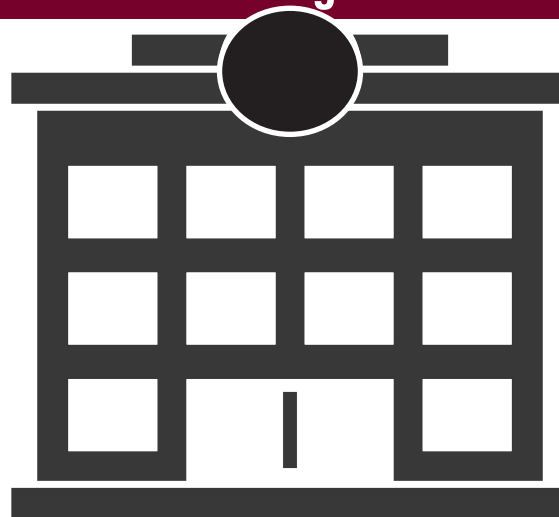

When the parent business has a number of practices operating under it, you can set up those practices in the Organisation Register as Organisation Sites under an Organisation Record.

Members of the organisation with the

HPOS-Org-Admin

Attribute will have view and amend access to information in the Organisation Record and the Organisation Site Records for both.

Healthcare Organisation

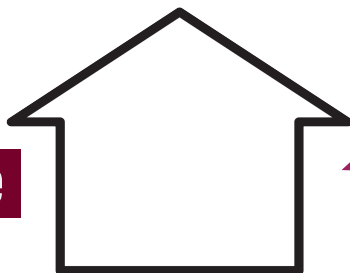

Members of the organisation with only the

HPOS-Org-Site-Admin

Attribute will only be able to view information in the Organisation Record, but view and amend information across both Organisation Site Records. Access cannot be limited to just one of the sites.
